Compost Collection for Apartment/Condos!

The BINS!

- Keep them near other waste receptacles.
- System similar to a garbage & recycling service.
- To prevent contamination, we will provide a locked, wheeled bin and keys for participating residents.

HOW IT WORKS...

1

Once your building is registered you promote the program to residents. Residents sign up individually via the website. We send them program info, starter kit, and keys. We also handle communication, education and billing.

2

Residents collect food scraps in kitchen bin and empty them into the locked Compost Crusader disposal container in refuse area.

3

We pick up materials weekly or bi-weekly, depending on season, and take them to the compost facility for composting.
